TRANSPORTATION AGENCY SURVEY

INTRODUCTION

The purpose of this report is to provide summary data on selected transportation agencies in California. The data has been collected and summarized to assist the Transportation Authority of Marin (TAM) in discussing the potential future of the agency to expand its mission beyond the current responsibilities for Measure A and congestion management. Although I did a cursory review of twenty agencies around the state, I chose nine of them for presentation in this report. I chose these nine because they represent a range of different origins, missions, sizes, and variation in the way that their functions are organized. The purpose of this information is not to identify the agency that TAM needs to mimic, but to use the data as reference points for the discussion and decision on the most appropriate ultimate functional organization for TAM.

The agencies surveyed are:

- Sonoma County Transportation Authority (SCTA)
- Napa County Transportation Planning Agency
- Alameda County Congestion Management Agency
- Alameda County Transportation Authority/Improvement Authority (ACTA/ACTIA)
- San Francisco County Transportation Authority
- Solano Transportation Authority
- Contra Costa Transportation Authority
- Santa Clara Valley Transportation Authority (VTA)
- Riverside County Transportation Commission

Table 1 provides a summary of agency characteristics on the origin, number of employees, budget, personnel budget and organization functions. These characteristics are discussed in more detail in the sections below.

AGENCY ORIGINS

The origins of these agencies vary, but several began their organizational life as joint powers agencies and with the passage of state Prop 111 congestion management legislation, then became the designated congestion management agency (CMA) for the county. Others, such as San Francisco and Contra Costa, were created with the passage of local referenda establishing local sales tax programs and then designated as CMA's. Some were created by merger of existing agencies (Santa Clara VTA) and others were established directly by the legislature as special districts (Riverside County).

AGENCY FUNCTIONS

The most straightforward set of functions occurs in a single purpose agency like ACTA/ACTIA. Their primary function is to insure that the projects and programs in the expenditure plans are delivered to constituents; therefore, the functional activities are heavily weighted toward engineering and financial oversight. There is coordination with the Alameda County CMA, especially in the programming of funds, but the CMA functions in the county are carried out by the separate agency.

Some of the agencies on the list perform a dual role of sales tax agency and CMA (San Francisco and Contra Costa). This dual role has proven to be an advantage for making fund programming decisions, especially in highly leveraged situations. Programming and funding priorities can also be set by one policy body that takes into consideration the potential for congestion relief. In many cases, these agencies achieve both CMA and sales tax program goals through complementary, and even, synergistic outcomes.

With respect to land use functions, there is a good deal of variety in how the responsibilities are carried out. In San Francisco, the traditional land use planning functions are carried out by the City's Department of City Planning; however the Transportation Authority is taking increased initiative in focused land use studies that are related to significant transportation policy and investment decisions. In Contra Costa, growth management was included as a function of the agency when the sales tax referendum created it, and in Riverside County, long range resource and land use planning were a part of its legislated mandate.

There are three agencies in the survey that function as providers of transit services. For the smaller agencies, the service is provided through contract, but for the larger agencies, such as VTA, the agency provides the service directly. This functional difference is reflected in the size of VTA's personnel budget in relation to the total budget.

AGENCY PERSONNEL/STAFFING

Agency staffing ranges from four to eight in the smaller agencies (Sonoma, Napa, ACTIA) to over twenty for the larger planning agencies (Riverside County), and up to over 2,000 for a large agency, such as Santa Clara VTA, that is responsible for a full range of transportation functions. Although Sonoma is the smallest of the agencies, there is a proposal to increase agency staffing by four (4) FTE's to respond to the new demands of the sales tax measure.

Attachment 1 contains the organizational charts for each of the nine agencies. The most common staffing plan for the smaller agencies that are both sales tax funding agencies and CMA's is an executive team of director and deputy

directors for finance and planning or programming; a clerk to the Board who also may provide administrative support and legal and oversight functions usually performed by outside contractors. Additional technical support personnel are added as the workload increases and the need for special expertise is more cost effective to provide in house.

AGENCY TOTAL BUDGET/PERSONNEL BUDGET

Attachment 2 contains the annual budgets for the nine agencies surveyed. Budgets for these agencies differ according to the number of functions that the agency is responsible for, the size and complexity of the sales tax expenditure plan, and the amount of funding that is passed through the agency for the work done by other agencies.

It is difficult to compare the differing agency personnel budgets with each other or any ratio of personnel to total budget. However, for the smaller agencies with the least functions, the range is roughly ten (10) to fifteen (15) percent of the total budget allocated to salaries and benefits. There are many reasons for the variation, but it appears that the ratio may decrease (in other words you get more use out of the administrative burden) when the agency reaches a medium size and is not responsible for transit operations.

SUMMARY

In reviewing the agencies in this report, it appears that TAM is similar to other smaller agencies that have a dual role of sales tax program administrator and CMA. This model can be characterized as having a core of permanent staff that is funded from several sources augmented with contract personnel, depending on the size of the program, and divided along general functional lines of planning, programming, finance and administration. The level of planning, modeling, and monitoring determines the level of technical support needed in the planning and programming office. The financial office takes the lead in financial strategic planning, allocations, tracking project and program progress and administrative support. The executive directs the work of the agency, provides liaison with the board, and represents the agency in dealings with other agencies.

In considering an expanded role for the agency, the board needs to discuss and resolve the following strategic issues:

- What is not working well under the current system, i.e. what goals are not being met, functions not being performed adequately, or in a cost effective manner?
- What are the alternatives (administrative, political, organizational) for accomplishing these goals?

- What resources are available for any proposed change?
- What are the legal restrictions on TAM for assumption of expanded duties?
- When is the most productive time to have this strategic discussion and who gets involved?

TABLE 1 SUMMARY DATA FOR SELECTED TRANSPORTATION AGENCIES

Agency	Origin	Number of Employees	FY04-05 Total Budget	FY04-05 Personnel Budget	Functions
Sonoma County Transportation Authority	JPA Referendum	4 Permanent 4 additional proposed	\$2.8 M	\$514,000	1, 2, 3
Napa County Transportation Planning Agency	City/County JPA	8 permanent 2 half-time interns Plan to contract for legal service	\$7.1 M	\$770,000	2, 3, 4
Alameda County Congestion Management Agency	City/County JPA	11 permanent	\$23.8 M	\$1.2 M	1, 2, 3
Alameda County Transportation Authority / Transportation Improvement Authority	Referenda	7 permanent 3 contract Legal contracted	\$134 M	\$1.3 M	1
San Francisco County Transportation Authority	Referenda	22 permanent Legal contracted	\$211.1 M	\$2.4 M	1, 2, 3
Solano Transportation Authority	City/County JPA	16 permanent 1 part-time Legal contracted	\$5.9 M	N/A	1, 2, 3, 4
Contra Costa Transportation Authority	Referenda	13 permanent 2 contract	\$57.1 M	\$2.1 M	1, 2, 3, 5
Santa Clara Valley Transportation	Created by County; merged with CMA in	2,398	\$349.5 M	\$240 M	1, 2, 3, 4

Authority	referendum				
Riverside County Transportation Commission	Special district created by state legislation	25 full time equivalents	\$178.2 M	\$3.1 M	1, 2, 3, 5

Key to functions:

1 – Funding allocations

2 – CMA

3 – Long range transportation planning

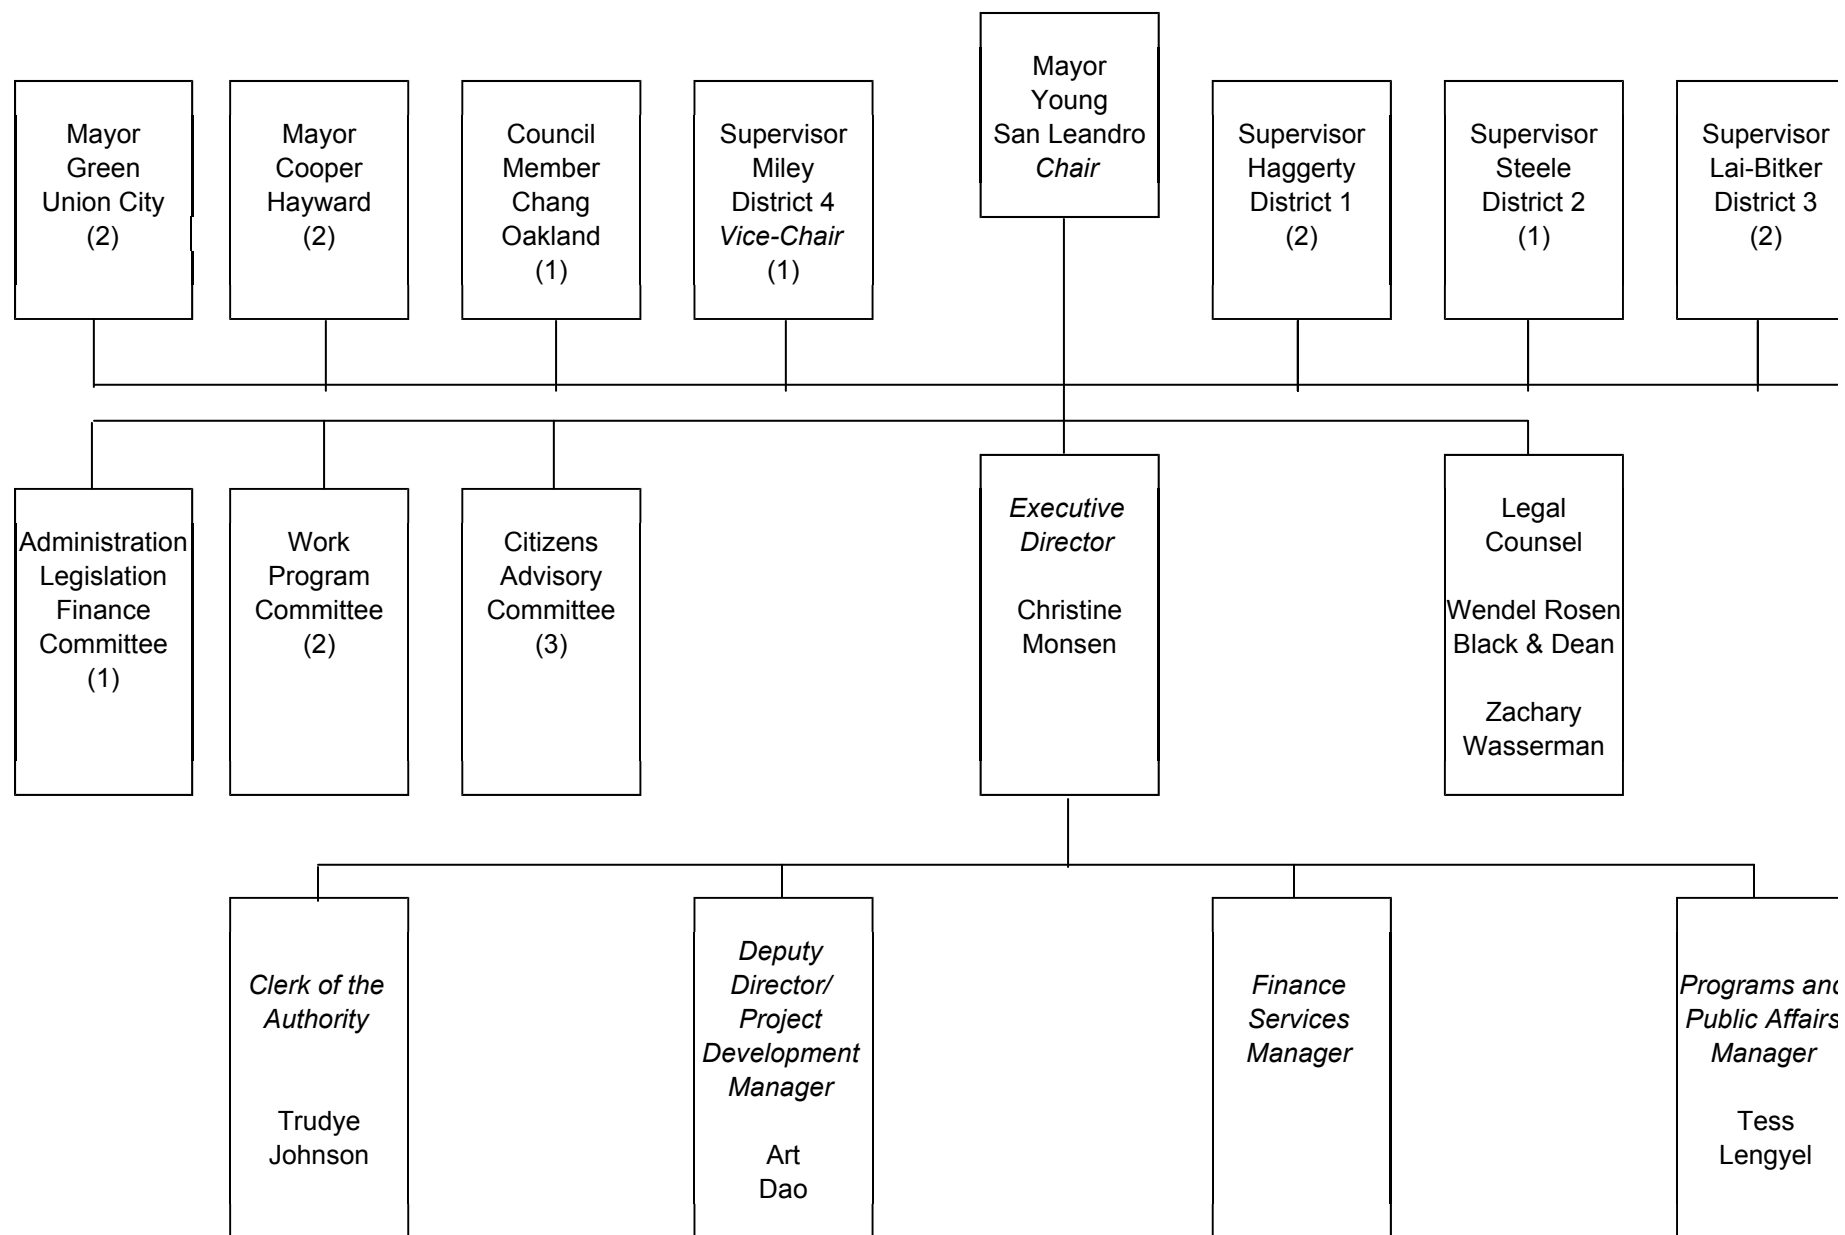

4 – Operations

5 – Land use planning

Total Revenues	\$ 79,563,384	\$ 1,550,471	\$ -	\$ 190,700	\$ 81,304,555

* CCTA staff will also explore funding from **state TCRP funds**. Though staff has received indications that the RM2 funding application may be favorably considered, at this point it is unknown if RM2 or TCRP funds are the more likely funding source for the reimbursement of the Caldecott Tunnel Fourth Bore project development costs. Until this is known, staff will continue to investigate and pursue as appropriate each funding source.
